

The Joubert and White Carriage Company

Joubert and White began the manufacture of high-grade buckboards in Glens Falls in 1865. A standard buckboard was constructed by running two planks of wood between the front and rear axles and mounting the passenger seat body on the planks. The only shock absorption was in the flexibility of the planks. When riding on the rough roads of their day, passengers felt like they were riding a bucking horse, hence the name. Joubert devised a way to attach two steel leaf springs, bowed upwards to the planks, with the passenger seat attached to the top of the springs. The seats moved vertically on the springs and also rocked forward and back, making for a more cushioned ride.

Pictured is a Joubert & White Mountain Surrey, purchased in original condition by Clark Anderson of Sebeka MN. This vehicle, a Joubert & White Buckboard Phaeton, and a history of the Joubert & White Carriage Company will be on display for your viewing pleasure at our anniversary celebration.

Our **40th Anniversary Celebration** is being held in conjunction with the Little Log House Show July 26, 27, & 28 2013

Hastings, Minnesota
